

ProBPM

SAP Expertise – Business Process Management

SUMMARY

ProNovia is the specialised competence partner for your SAP Business Process Management (BPM).

ProBPM means for our customers: They benefit from an integrated, state-of-the-art system solution that allows them to model and continuously develop all their business processes. Well thought-out process models facilitate implementation and ongoing management.

Business Process Progress

The progress lies in the strategic SAP BPM solution approach: Processes can be individually designed, mapped, controlled, automated, transformed, monitored or analysed. The range of functional possibilities opens up new ways for companies to define and handle business processes.

The challenge

The design of innovative business processes requires intelligent, market- and customer-focused process modelling. Activities, roles and objects must be abstracted and clearly defined.

Solution components

- Graphical process modelling based on BPMN 2.0
- Based on SAP business workflow
- Operation via SAP GUI and SAP Fiori
- Integration of SAP business objects
- Dynamic process adaptation
- Ad hoc workflow

- Rule-based process control
- Process monitoring

Practical advantages

- Service-oriented architecture ensures continuous optimisation of business processes.
- ProBPM provides process models, methods, technologies and reference content for modelling, configuring, executing and monitoring these business processes.
- Standardisation of workflows
- Increase in process reliability
- Reduction of manual errors in operational processes
- Reduction of system interruptions within the processes
- Investments in existing systems are protected and at the same time a new level for company-specific processes is offered.

YOUR BENEFITS

With ProBPM solutions from ProNovia, you can make all your business processes more competitive in the long term. The investment in the company's own Business Process Management opens up new entrepreneurial perspectives.

“ProBPM provides companies with the tools to continuously optimise business processes. Thanks to innovative process ideas, this SAP total solution makes it possible to achieve far-reaching progress with little effort. This enables companies to respond more quickly to changes and operate more flexibly. The necessary investments are exceeded by the benefits of ProBPM within a very short time.”
