PRODUCT FACTS

ProBaseline supports the evaluation of data and structures generated with Pro-Configuration. Thanks to the simple user interface, baselines can be created and output in various formats according to individual requirements.

Advantages

- Simple and efficient creation of baselines – also for end users
- Versatile output options depending on application purpose

Properties

- Customizing environment for extensive configuration
- Integration with other ProNovia products possible

- Business add-ins for implementing customer-specific functions and interfaces
- Delivered GUI language support in German, English and French
- Detailed documentation in German and English
- Authorization objects for integration into the SAP authorization concept

Prerequisites

- ProConfiguration

PRIMARY FUNCTIONS

In addition to ProConfiguration, ProBaseline offers many functions for the evaluation of data and structures. Depending on the application, you can output objects and data in other formats, which enables optimal further processing.

- Efficient creation of baselines
- Definition of organizational units
- Definition of output format
- Assignment to transactions
- Definition of selection parameters

You want to evaluate data and structures created with ProConfiguration efficiently and tailored to your needs? The best solution is ProBaseline. With this product, the evaluation is extremely user-friendly and users have various options for defining objects, data and output.
