PRODUCT FACTS

ProAdmin provides essential functions for maintaining incorrect data. These can be consistently corrected and cleaned up thanks to simple tools. Mass operations additionally support the reorganisation of a wide variety of master data. In addition, ProAdmin enables an exceptional user experience thanks to state-of-the-art technologies.

User interface

- Integration of individual and mass administrator functions in the ProPLMClient of ProNovia
- Administrator Interface
  - With information about the objects
  - Execution of individual and mass administrator functions
  - With SAP standard transactions
- With SAP standard and supplementary ProAdmin standard and ProAdmin object search helps

Advantages

- The modifications to the PLM objects can be documented traceably in logs and support the SAP change documents
- Can be used to correct individual data records as well as mass mutations
- Access protection via defined authorization objects

Properties

- Customizing environment for extensive configuration
- Integration with other ProNovia products possible
- Business add-ins for implementing customer-specific functions and interfaces
- Delivered GUI language support in German, English and French
- Detailed documentation in German and English
- Authorization objects for integration into the SAP authorization concept

PRIMARY FUNCTIONS

ProAdmin is the perfect tool for correcting erroneous data. It offers several critical functions that allow easy customization of single or multiple files simultaneously:

- Setting status / administrator
- Migration of document data including document type
- Storing / importing / removing / exporting original documents
- Deleting document content versions
- Changing classification data
- Writing SAP logs

Thanks to its clear display, ProAdmin users can clean up the data that needs to be adjusted with just a few clicks – individually or several at the same time. This is how you optimize data and processes and generate more time for productive work steps.
