

ProMassMaintain

SAP Solution – Data Mass Maintenance

Functions

- Creation / management of mass maintenance tasks
- Mass changes to SAP master data objects
- Configurable mass maintenance scenarios
- Object selection based on
 - SAP object search
 - BOM explosion
- Maintenance in tabular form analog to MS Excel
- Automatic validation of data
- Integration of mass maintenance as an activity in the master data maintenance process with ProProcess

Technology

- Based on ProFramework from ProNovia
- Extensive development and configuration of cross-object, modular applications possible
- First-class user experience independent of UI technology

User interface

- Display of master data objects in tabular form
- Highlighting of the fields to be edited
- Fields for display only
- Change
 - of single values
 - via multiple selections
 - of values in whole columns
- Types of change
 - direct value entry
 - inserting values via drag'n'drop
 - set, replace, initialize values
 - insert values from cache
- Access protection via defined authorization objects

Advantages

- Defined mass change scenarios
- Efficient editing through Excel Similar user interface
- Integration of SAP standard data validation
- Data governance for mass changes

PRODUCT FACTS

„ProMassMaintain enables configurable mass changes to SAP master data objects in a simple and clear tabular form. This allows you to quickly and securely make your SAP master data changes and achieve the required data governance.“

Properties

- Objects
 - ProMassMaintain allows the implementation of mass maintenance for any SAP master data objects
- Processing scenarios
 - Flexibly definable processing scenarios via customizing settings
 - Definitions regarding object scope, changeable fields, displayable fields, type of object selection

Optional extensions

- Mapping of the mass operation / change as a process with ProProcess
- Integration of rule-based maintenance and checking of material master data through ProMaterialData
- Additional data checks between material, BOMs, plans and documents through the integration of ProConfiguration
- Integrated application in the ProNovia Application Framework „ProFramework“

PRIMARY FUNCTIONS

With ProMassMaintain, master data maintenance can be performed quickly and easily as a mass operation. With predefined variants that determine the type of object selection, the scope of master data and classification data, and the type of data check, role-based tasks can be directly integrated into the master data maintenance processes.

- Configurable mass change functions
- Maintenance of data in tabular form (analogous to MS Excel)
- Integration into the workflow of the master data maintenance process
- Validation of datainput
- Flexible architecture for extension to any SAP objects

In a simple and tabular form, users can make defined mass changes to SAP master data objects. This guarantees a fast and secure change of your SAP master data.
